

Are you facing challenges in your Quality Assurance (QA) organization?

We help you achieve compliance and streamline your operations

Our quality management and compliance team understands the complexities and demands of the pharmaceutical industry, especially in the Nordic region.

We have the experience you need to navigate intricate regulatory landscape.

- Apply and maintain of local licences (Wholesale Distribution Authorizations [WDAs], narcotic licences, Safety stock in Finland)
- Development and maintenance of Quality Management Systems (QMS)
- Responsible person (RP) services, local affiliate GDP and QA services
- Vendor management (wholesalers, distributors, transport companies etc)
- Supply chain issues with wholesalers
- GxP audits and gap assessments, mock inspections, shortages
- Quality Technical Agreements (QTAs)
- Product Quality Complaints (PQCs)

Compliance in the Nordic supply chain requires a compliant fiscal and physical setup, correct local licenses, responsible persons, and adequate QA personnel.

Our team of experts have extensive experience with Nordic local affiliate GDP and QA regulations.
